

NONOSZ

**Veterinary product containing natural and nature-identical ingredients.**

**A.U.V.**

Target organism:

Honeybee (*Apis mellifera*)

Recommendation:

Prevention and treatment of gastric disease (*Nosemosis apium*) of honeybees.

Application, dosage:

Externally: sugar syrup shall be prepared from 50% sugar and 50% water; 10% NONOSZ solution shall be prepared from 900 ml of sugar syrup and 100 ml of NONOSZ preparation, or alternatively from 900 ml water and 100 ml of NONOSZ preparation. This solution has to be sprayed, sprinkled or poured into the honeycomb channels or on the bee population, 50 ml per family, five times consecutively. It is extremely important to ensure homogenous distribution of the preparation in the syrup. The temperature of the syrup must not exceed 50 °C.

Application instructions:

Usage of the preparation is recommended in autumn, after removal of the honey frames from the hive, to the last feeding, and in spring, after the first purifying flight. In case of justified suspicion of heavy infection, also confirmed by laboratory tests, the treatment described above shall be repeated.

Contraindication: not known.

Side effects: not known.

Sanitary-alimentary waiting time: not necessary.

Formulation: solution.

Composition:

Ortho-hydroxy benzoic acid, sodium salt: 10 g

Fractionated and condensed water extract of *Beta vulgaris cv. altissima*: 50 ml

Distilled water: 100 ml.

Storage:

To be stored at temperatures under 25 °C, in frost-protected place.

Keep the product sequestered from children.

Attention:

The preparation shall be well shaken prior use. The preparation is exclusively meant for treatment of honeybees.

Work protection instructions:

The general work protection rules shall be respected. After contact with the skin or eyes, wash with plenty of water.

Preservation:

In its original packaging, the preparation can be used within two years (24 months) from manufacturing date (marked on the label).

Marketability:

The preparation is freely marketable, no veterinary recipe is needed.

Packaging:

One-litre plastic bottle with safety cap.

Environment protection instructions:

Unused amounts of the preparation and the packaging material do not require special measures of waste management.

Registration number: 27/2004. FVM
